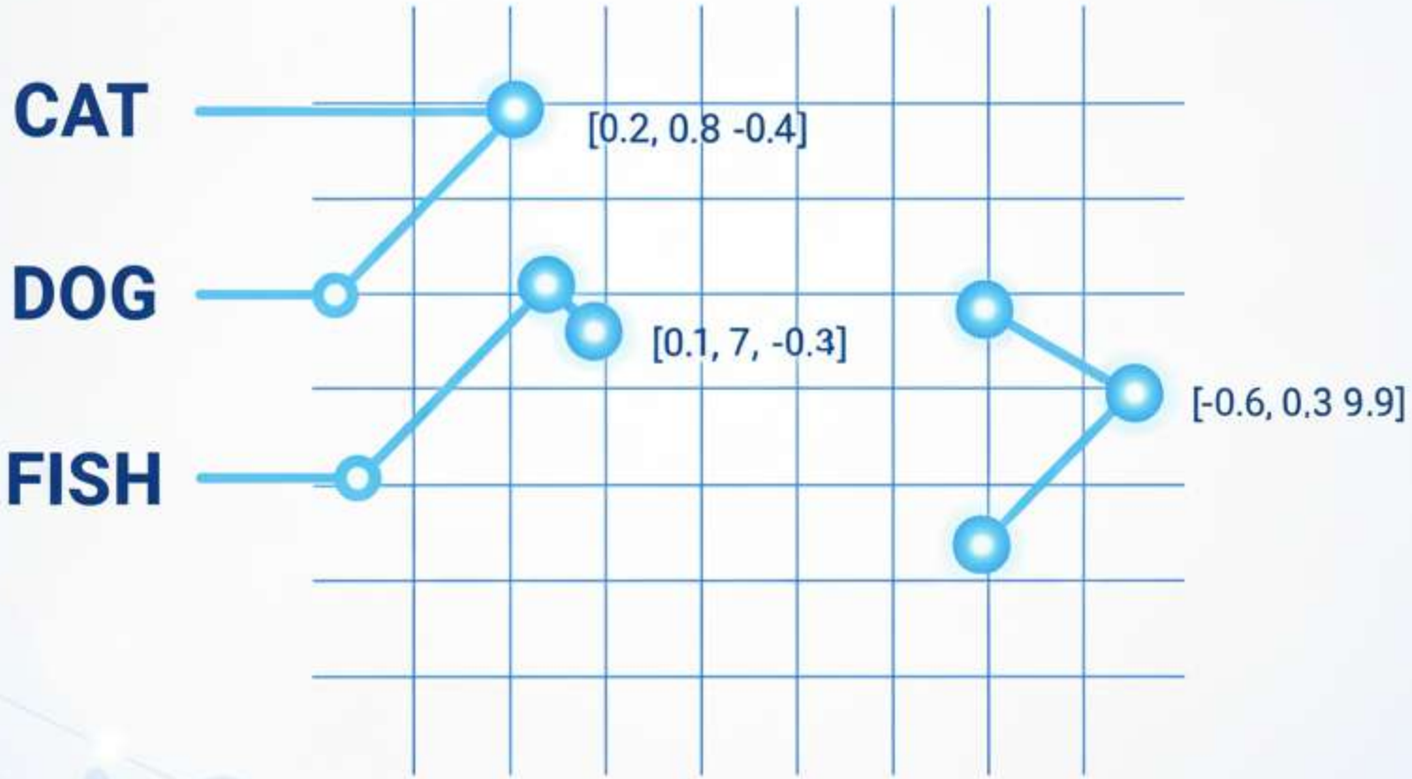
WORD EMBEDDINGS IN NLP

Teaching machines to understand the meaning behind words

WORDS → NUMBERS → MEANING



Word Embeddings represent words as dense vectors where where similar words to closer in space.

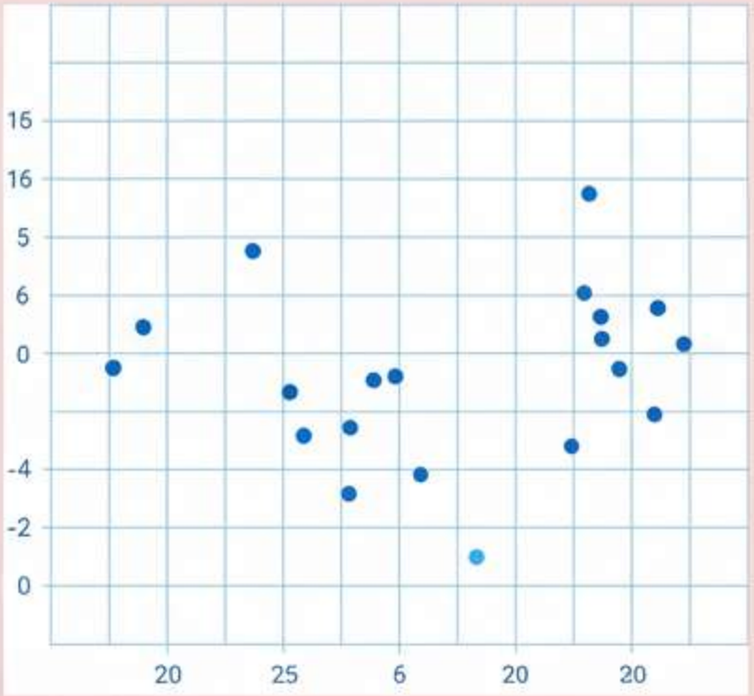
WHY NOT ONBDINGS IN WORD?

Teaching machines to understand time meaning behind words

WORDS → NUMBERSS OF MEANINGS

ONE-HOT / BoW

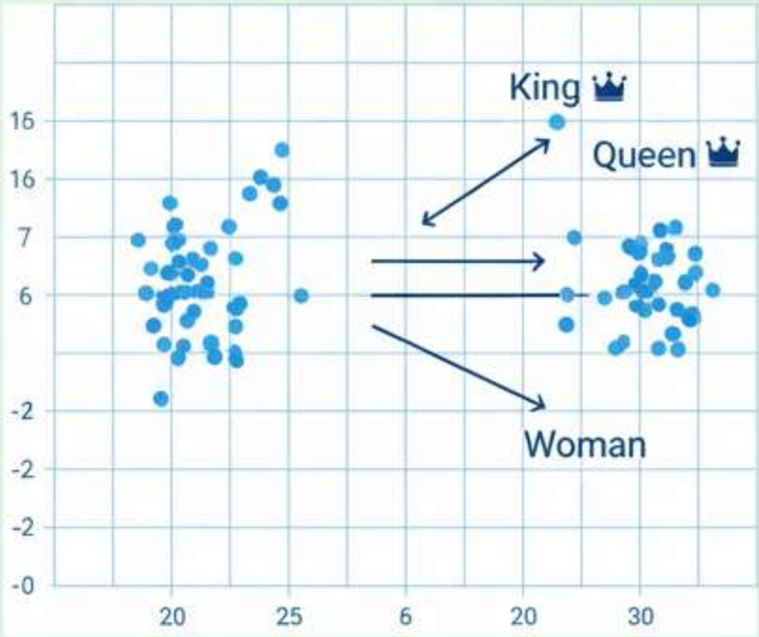
- High-dimensional
- No meaning captured
- Only word presence



WORD EMBEDINGS

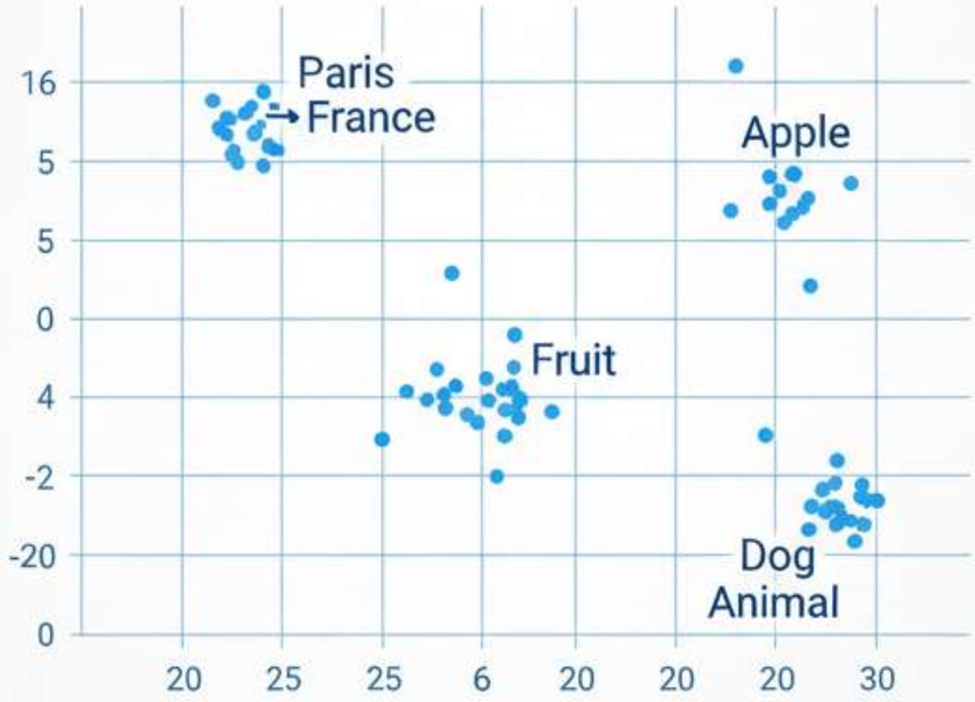
- Compact & meangiful
- Captures simiarity (King → Queen 👑)
- Learns relationships like:

King - Man + Woman < Queen



HOW WORD EMBEDDINGS TRANSFORM NLP 🚀

- ✔ Understands context & meaning
- ✔ Boosts ML & Deep Learning models
- ✔ Foundation for advanced, GloVe, FastText, BERT)



From words to meaning – that's the power of Word Embeddings!
